Subject: Superfund program site selections for the OIG's audit on OLEM communication of human health risks

Good Morning, Helen and Jim.

Helen, Thank you for your help in providing us with Superfund site suggestions for the OIG's assignment on, *EPA Communication of Human Health Risks Posed by Sites in the Office of Land and Emergency Management's Programs (OA&E-FY19-0031)*.

We've made an initial selection of 2 Superfund sites to review.

From the list of EPA's suggested sites, we will look at the **Anaconda Smelter Site in Region 8**. From the OIG's own research efforts, we plan to look at the **Coakley Landfill in Region 1**.

The OIG's research efforts included a literature and media search as well as a review of EPA site-specific webpages. To select sites across the OLEM programs, we looked for regional and geographic diversity, diversity in amount and type of contaminants as well as the type of site, e.g., mining, manufacturing, landfill, etc. We also prioritized sites where the OIG had received a hotline.

We will begin looking at the sites and reaching out to regional site contacts in the next few weeks. Please let us know if the site contacts have changed. If you have any concerns about our site selections, please let me or Tina Lovingood know before COB on Tuesday, March 19.

Thank you,
Jill Trynosky
